

WARPED PASSAGES – ART PROJECT BY PATRIZIO TRAVAGLI

PATRIZIO TRAVAGLI

The Italian artist Patrizio Travagli (Firenze, 1972) uses optical laws and perspective as a kind of hybrid – tool to create multiverse perceptions. His world looks more like a laboratory – constantly morphing in space and time, light as an art medium becomes the primary theme.

warped passages: Art Project by Patrizio Travagli for DIFC Gulf Art Fair

Located at: DIFC – Dubai International Financial Center

on show: Tuesday, March 6, to Saturday, March 10, 2007

description

The installation *Warped Passages* (2007) located in the sensational heart of DIFC, displays 8 walkable wells lights. As you walk into them, you perceive a dynamic interaction between space, body and time: the illusive nature of reality and the possibility of further dimensions. Each well lights (105 cm x 6 cm high) has a specific colour, chosen from its recurrence in different world cultures, converging in a virtual sphere. The available colours are: blue, greyblue, green, pink, brown, yellow, purple and red.
